### What is this Product?

#### Type:

The Fund is a sub-fund of EdenTree Investment Funds – Series 1, a collective investment vehicle constituted as an umbrella fund in the UK, authorised by the FCA as an Undertaking for Collective Investment in Transferable Securities (a "UK UCITS").

#### Term:

The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Fund prospectus, the Fund may be unilaterally terminated following written notice to unitholders subject to compliance with the Fund prospectus and applicable regulation.

#### Objectives:

The Fund aims to provide long term capital growth over 5 years or more with an income by investing globally in companies which, at the core of their business, provide sustainable solutions to some of the world's environmental challenges.

The Fund invests at least 80% of the Fund globally in shares of companies whose core products and services address global sustainability challenges, with a particular focus on the environment. Up to 20% of the Fund may be invested in other assets, including shares of other companies, open-ended funds (including funds managed by EdenTree and its associates), money-market instruments, derivatives and forward transactions, deposits, nil and partly-paid securities, bonds, convertible bonds, cash and near cash as deemed economically appropriate to meet the Fund's objective.

The Fund will focus on companies whose products and services offer solutions for the following themes;

- Alternative Energy (the generation, storage and distribution of clean energy)
- Energy Efficiency (the enabling of a low carbon transition)
- A Circular Economy (solutions for sustainable materials and resource stewardship)
- Environmental Services (pollution control, testing and impact management)
- Water Management (water conservation and management)
- Future Mobility (technologies and services enabling sustainable transportation)
- Regenerative Agriculture (sustainable food production)

There are also certain sectors and economic activities where we consider the sustainability risks fundamentally misaligned with our sustainable investment approach. We therefore apply baseline exclusions to actively exclude such companies from our investment universe. Details of our exclusion criteria are available at [www.edentreeim.com/fund-literature](http://www.edentreeim.com/fund-literature).

The Fund's base currency is GBP. Shares for this class are bought and sold in USD. The performance of your shares may be affected by this currency difference.

You can buy and sell your shares daily. The minimum initial investment for this share class is US\$1,000,000.

### Risk Indicator

Lower Risk

Higher

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
- We have classified this product as 6 out of 7, which is the second highest risk class. This rates the potential losses from future performance at a high level and poor market conditions are very likely to impact our capacity to pay you. This classification is not guaranteed and may change over time, and therefore may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
- Be aware of currency risk. If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
- Please refer to the product's Prospectus for details of other materially relevant risks that may apply to this product.
- This product does not include any protection from future market performance so you could lose some or all of your investment.
- If the product is not able to pay you what is owed, you could lose your entire investment.
